MINING AGENCY.

THIS Agency consisting of D RISS Wood President,

N 5 (LIVER M D) Secretary and Irequirer!

E. COLIES Manager H McAllister, R S
WOLER MATT FRANCE and CLETIS has been established for the purpose of negociating bales of Mining This object it proposes to effect by obtaining all possible in ormation about Mining Troperty which is for sale, and bringing that information under the notice of Lapitalists in all parts of the Union, and in other Countries. ts intention is to represent property truthfully, to sell to Mire for more than it believes it be its value, and in no case to isk any advance upon the price fixed by the owner. It will further avoid all speculation on its pun account of the property of ccount acting simply as an Agent between Seller and In this way at believes that it will secure the confidence of Cipitalists and the means of bringing about large in ves ments in the Mines of the Territory and taeir corse quent develorment

All Persons having Mining Property to sell, are invited to put themseives into correspondence with the indersigned E COPLEY,

THE CAUSE OF IT ALL,

In a city o' Nunster an a woman ciec, and the neighbors desired to give her a grand water ne foors of the house were very snaty, and the people we're warned by the priest and other aut writtes that they must not have their cere monies in the upper room where the deac body lay The friends rate no at ention to the warn t wou d probably have been confrar to precedent to removagine compse before the time for its fina remova. So the neighbors galieree in the un er folm and amontest and viere very merry until the foor gave way and they all that the wave was only the originning of trag ad in time to certify the ceatas. But the ceat. I it hours, the you? bodies were and out will some order and ce cency in an undamaged room, and the doc or ascec "An, then test his sow," went i chorus dial In the garden? " "Garden! the other praises acided "And this poor the wal." I sen I ilis explained to justo, and gir 211-4the Lore have mercy on her, for a setter gir never crew the orests of 1 -," and four to lar cock - Wax tieler ien ier name was given amic fres i laises and roaming choruses of assent has he doctor vent his melancholy with, and surveyed cor ne fter corpse in every case thus far he has

TIONESTY RECEIVES ITS RE-

a "- 1ppleton's Journal

WARD The following anecdote is related of Mr. Spea, a grocer in Portsmouth, N. It ap wars trat a man rac par hasde some wool of 1 a, which had been weighed and said for, and Vi Siea had gone to the cesk to get change there, he saw in a glass which swung so as to refect the shop, a stout arm reach up and take from the she f a heavy white oak cheese. In stere of appearing sucdenly and rebuking him for the theft, as another would and there by los in, his custom forever, the crafty old gentle man gave the tiref his change as if nothing and ha sence, and then, under the prefence of lifting the rig to kytton is torse o tim, took ho c of it, and exc rimed -

Way, bessme, must are record the weight wrong "

'Oh, no,' said the other, "you may be sure you have not, for counted with you!"

4No, not said the other, staying the rands ie did, paying for his honesty by receiving the sam mi k c leese at the rate of forty four cents a moint —the mice of the woo

ANUARY 22, 1876.

Official Paper of El Paso County. THE LOCAL PAPER.-You owe it to yourselves to rally liberally to its support, and exact from it as able, high toned a character as you would do from any educator in your most. It is in no serie beneath notice and gare-forint is your representative. Indeed, in its character, and chief in this Territory shall desire to surit is the summation of the importance, interest, and welfare of you ait. It is the aggregate of _ca ion of such early to any other person, such your own consequence, and you cannot ignore! New ork Times, ce

ast week we issued an extra edition of severa hundree co des pf the Gazette, expecting an unusua, demand, on account of its interesting stitustical matter. 1 Notwithstanding this, every copy was sold a few hours af er the edition was on the street, and many persons, who desired extra copies to send East to their frencs, for the maintenance and education of the same, son ensuare, net, or trad any such chair or parcoulding the accommodated. In compliance with tamerous requests, we therefore to day re-, publish our "Review of 1875," and similar ac-Computating autoles.

The Ute Pass road is now a good road, probany the best read through a mountain pass, in al Colorado. But a places it is narrow, and should have lover it be largely increased, the tage county in which the parents of parent, of narrow places will make trouble with teams go- such child may reside, and a copy thereof, certiing in opposite directions, which may happen to field by the Recorder, shall be admitted in evimeet there In fact, trouble of this kind has already occurred, and at times accidents have

Use less, to the rear of Pike's Peak, and close to us in the South Park; and the completion of the totany old road, will shortly make the title cases in which the defendant is acquitted the Past total more extensively used than any wagon road in Colorado. In view of this fact, we suggest to our County Commissioners that they to be from and after its bassage. take early steps to water this road along its entire length, so that a wagon may pass another at any point therein. The expense will be trifling as compared with the benefits realized, and five humined inhabitants, may be included in it will not cost much anyhow.

We do not imagine our people will begridge county, roads. the money for this necessary improvement, for we think we are all agreed that we must have force from and after its bassage. absolutely perfect means of communication with the inchrountry west of us.

Will our County Commissioners give early attention to this important matter?

n another columb, in an article with a "Cold' caption; in our Manitou letter, and in our local rems, will be found all there is pub-It of the said to be extraordinary gold developments at Manitomana vicinity.

We are informed of what are states to be other equally valuable discoveries, not of gold, which we are at present not at liberty to comment upon but if one hundredth part of truth be found to exist in the tales that are to dito us. Recorder's office of the counties in which said: but shall take care of, and shall preserve, or the feture of Manitor, Coloraco City, and Col. officers are elected, and the same small be left shall bring into market, each and all parts of or the Springs will be something almost too delightful to reflect on fast now. But et us refeet on it. Suppose that these Aladein like is passage. stories are only a let e bit (comparatively) cor-

In the first place, Maniton will be built up and mide, for ever, Colorado City will have its full share of the fruits of the discovery. Notiong can take from Colorado Springs, the immense new trade and new population certain to come. Soluted as we are, there can be no competition with its for the lion's share of all the benefits inevitably to accrue. There will be no more vacant bouses in our midst. New buildings will be erected by hundreds. Every man in our midst will be assured of constant remunerative employment. There will be no more cry of dull times. The vexed Railway question will settle isself. We will be in a position to get what we want, without incurring any bonded indebtedness. Our population will be so speedily and greatly increased, that our farmers and stockmen will find a reacy market right here, for all they dan possibly raise.

Unlike most mining districts in Colorado, in not exceed the sum herein appropriated. which for six months in the year mining operations cease on account of snow and the severity of the weather, the operations at Manitou can De carried on all the year round, cay and night, if necessary or desirable, so that we will have one continuous "busy season." Denver and Fueblo must surely look to their laurels, for what is Stock of any organized rai roac or wagon, road now to prevent Colorado Springs from stepping to the front of Colorado's cities?

All this may be. If a favorable assay is reported of the 2,000 pounds of quartz sent on Private corporation, or in the construction of Thursday ast to the sampling works at Denver, all this, and possibly much more, will be. the report is unfavorable, we will not regret our to affect, in any manner, the validity of bonds vision of a bright future, for we be ieve that "it heretofore issuet, or to prevent the payment of is better to have loved and lost, than never to

As matters stand at present, we must conless to high hopes.

Taken, a together, he year just past has not icen a rac one or us, here in Colorado Springs. In the county of E. Paso at large, of course our farmers are out of socket on grass to oper account, but as most of them also own stock, they are not so very bac, y of after a . The year has been a solencic one for our stock interests, the grass on the range has been good, and sticontinues so, and stock has been and still is in ine order. In accition to this, our stockmen nave been enabled to se off their surplus stock at very emunerative figures.

The prospects for 1876 are good, in an agricu tural light. It is not anticipated that the farmers are arranging to put into cu tivation a arger acreage than ever be ore.

1875.

There were thirteen buildings erected ast year at, a cost of \$41,500, which may be classifiec as fo ows:-Four Residences, costing. \$7,100 One School house i \$1.1,100 FRAME. Act ition to "Mansions," costing . . . Clif House, " Six Residences,

L FOUR YEARS AGO.

In anuary of ast year, the GAZETTE oub-Is hed an article, headed "Taree Years Ago." We reproduce it now, with such changes as are necessary under the altered circumstances:-The review of the past years and the summary of what Colorado Springs, has now jat at nec to, calls up a vision of the Pasti.

In anuary, 1872, on v five months had passed since the driving of the first stake by the surveyors, and already considerable work nad been Jone, but it was, in truth, a day of sma... things, as compared with theoresen; t me. Cascade Avenue and Tejon Street were, so

far as we recollect, the oxy two streets on which any buildings had been but up except tiree nouses on Nevada Avenue,) and the cuestion ay between the two which was to be the pusinessistreet of the town, with the chances in avor of the former.

On Cascace Avenue, the principal outding was the hotel, which had jut seen competed, and which was opened, under the management of Vr. Fary McIntire, on New Year's Day, 1872 The hotel, by the way, did more than anything e se in the town to give it a start, inastauch as it aforced comfortable accommodation or all who came, and thus helped to give them a good impression of Lings at he outset. Let a man have comfortable eating and seeping, and he looks on things hrough much more rosy glasses than he otherwise would. South of the note, was Field & lin's store, (afterwards True & Sutton's). In the Loper story was the Coony Office, where Messrs. Nettieton, Potter (now P. V.) and Kingsley (son of Canon Kingsley) were generally to be found; Genera Cameron and Mr. Jahor arrived a few weets ater, Next came Ava Acams' harcware store, (which afterwards became 'Acams, grass rop lers wi de arount again, and our Wison & Co.'s, then Barton & ocgman's furni ure store, anc is now Balor's ivery stable). Next was a sma building a joining, which was the joint crice of Matt. France and Dr. Gatene'l, the former being then the telegraph operator as we as the real estate agen of the place. Next came Nye's restaurant, waira nas since grown up into the E Paso notel. On the next nock was Dr. Barrett's drug sore, (now Barnes' nardware store); in which Han ey a so had a news de lot, and Dr. Clutter his office, and, over it, cote's Hall. On the upper end of Cascade Avenue, were Mr. Papor's nouse (now uc'ge Ranca''s) and two mail dwe ings just beyond it, one be onging to Mr. Channing Sweet, are one to Mr. More, of the firm of A obre & Car ile, who they kept the La Font

Livery Sanes. This, we think, was all that Cascace Avenue had to show. On Tejon Street, Goodrich & True's (now Strayer & Mark and Gen' Harris) store was the most imposing structure. Keeping it company was Freeman's meat market, Becker's narress 814), Folmes' livery stan e (now Weed 5,500 york south, were Mrs. Gi ther's "lioneer" boot and snoe store, and another ment market (now a second aand store) of which Reef & Allen were the proprietors. On the opposite side of the street were the railway offices, and, if our memory serves us, Grana's house and paint snoo. We are not cults sure whether the only in progress. Lower down was Mr. Con ey's'

On Navada Avenue were the Hunt House and Mr. France's house (noth of which seemed to have been stuck right away in the suburba). and one other residence on the corner of Pike's Pea (Avenue.

On Bike's Peak Avenue were the La Font Livery Stables, nese, so far as we recolled, were a the buildings in town, except the Log Capin down by the rai way, and some stables where the neight cepot is now located. There may have been three or four other ma. houses scattered about the town site, which we do not recal. Summing up these, there were from twenty-

five to t lirty bui cings in the town, and a nonu'ation of, propably, fi ty to seventy-five, for the in a pitants certain y cic not run five to a nouse. There were no churches in those days, and Foote's Aall did duty as place of worship, bal!room, concert room, and public gathering Dace general v. It was sone time after when the Methodist church was built, and then its build-1,500 ers had so ittle faith in the permanence of the town that they constructed it so as to easily be removed when the "mushroom-growt?" should cease are begin to withe away. Nor was there any post-office, Colorado City

being then the point to vinion he mail matter was sert. The late ocalliof the GAZETTE used to rice over on mu s-back and fetca it, and a box was provided for s reception in Field & il.'s store, whither people wert and he ped tiemselves.

Nor any public schools, properly so-called, a though Mrs. Palmer taught a lit. e school in Mr. Parsor's gouse, to which all the children were 'ree to go.

The rees had not been planted, and the laxes evied for the last thirteen years, will be dittees had not begun it fow, and the people o Colorado City vowed they never would, for t'iey said that, in the firs, place, the water would have to run up his to get through the canal as it had been surveyed by Vr. New eton, and, in the next place, that there never would be any

wa er to run in them. The only coa to be nec was that from Genrang's pank, which was scarcely worth burning. laere was neither pakery nor pank, and it was easy enough for becase to be economical, as there was little chance to waste money on lux.

The grass and the soab-weed grew thick in a the streets, and an occasional rattle-snake 195 00 mas ciled by the ew als who were numbered 185 25 among the population. The can'y excitement was the coming-in of the cars, and each new-comer was a subject of the coesest interest. Colorado Sorings, it should be noted, was then the terminus of the rai way, and a souldern-bound passengers

changed here to Barlow & Sanderson's coaches.

Strangers who came or head to or pleasure,

The Manitou gold fever has been for the past few weeks, gracially creeping over our fuale population, until at ast it possesses them en are--and it seems proper that we spould now ive some lift e a slory of what may with twopriety be called the second "Pike's Peak" exitement-the in neral discoveries which call forth this article being in al., directions around, the base o Dixe's Peak.

Our readers are amiliar with the progress of the "Legal Tender" silver loce, on North Cheyenne Creek, about 8 miles, rom this town, work on major age for weeks past been prosecuted energetica y by the owners, Messrs Sack & Mataets. From this mine ore is now being taken which yie ds \$50 in silver to the ton, and increasing in richness as a greater depth is attained. The discovery of this lode created a riph e of excitement among our citizens at the time, which excitement was augmented by the, ciscovery by Dr. Nathan S. Culver, of the Coorado Springs Mining Agency, of a vein of go d at Vanitou. The discovery was made about & weeks ago, and could not long be kept culet. As soon as it became known, some of our more enthusiastic citizens became prospectors, and have been scouring the hills around Manitou, with pick and showel, every since.

Dr. Culver's discovery, to which he has given the name of the "Ute Plss Lode," was made at a point one-ha! mile northwest of the 160. actes owned by Mr. George W. Lees, in the Iron Springs Crition. At the point of ciscovery the vein is 50 feet in width-t runs in a sout ieasterly direction, gradually en arging, throng's Mr. Lees' and, and the Iron Springs (former v Strickier's) property, until in the latter, it attains a wir to of 100 feet. It is what is denominatec a "contact vein."

Dr. Culver has run in a tunnel, and has had

several assays made at different points. The ore is a brecciated quartzite, There have been 6 assays mad., by Prof. Kerr, of Co.orado Springs, and by Mr. C. W. Terry, Territoria Assayer for the Lake City District of Colorado -which range from \$30 to \$110 of gold to the ton, with a trife of si ver. On Thursday of this week Dr. Culver sent

1,000 pounds of the ore to the samp ing works of Dr. Munson, at Denver, or a mai. assay the result of which is awaited with frembring anxiety by hundreds of people besides Dr

On Sunday: ast it began to be wrispered around that Major McAllister and Mr. W. B. Sherman had made a discovery of extraordinary character, near the Ute Pass Lode above referred to. As the particulars of this "ina" are now public property, it is not at a limproper to out them into print.

The discovery was made one fourth of a mile northeast of that of Culver. It is a surface deposit of fine grain cuartz of a red co or, similar to that of the 'Little Annie' mine in the Summit District. Lae surface deposit apparent y extends from the point of discovery, 350, feet in width, all the way to the head of "G en Zyrie." How far under the ground the deposit extends, has not been ascertained. Pieces of the quartz have been assayed by Prof. Kerr, and in numerbus trials, show from \$21 to \$80 to the ton in. gold, with no silver. Some assays vie ded not aing, which would seem to demonstrate that the ko'c is cenosited in spots. To the naked eye,

tio go'd is visible in the cuartz. The quartz is of such a character and so located, that it day be quarried and stamped at a total expense of not over \$4 per ton-and at Manitou a mill could be run cay and nigh, all the year rounc. .

Major McAllister and Mr. Sherman have oatec. 7 claims, the ore on which, in sign ground, has been estimated to contain, at \$20 per ton, over \$1,500,000,000.00 in gold. We are informed that, so sure are the owners of these caims, of the value of their discovery, that a 40 stamp mill is now on the way here, and will be lucated at Maniton on arrival.

The excitement following the amouncement of this "strike" may be better imagined than desc ibed. Co orado City and Manitou were at once emptied of their male population. On Monday, some one hundred men started off from Colorado Springs, and daily the number has been augmenter, unti now our streets are void of ife, and nearly all the pedestrians the eon are of the femin ne gender.

Any day during the week a traveler coming this way from Manitou, has passed men and boys on footmon torseback - sometimes coub ec u .- on mujehack, in wagons, carriages, a sorts o. vehicles, a. going to Manitou. Every man Fountain restaurant was completed then, or and boy with a pick, and a great many of them with anterns-for the prospecting and staking out of caims has gone on by night as we' as by day. The hi is from Manitou to Glen Eyrie are dotted with eager, groping, picking human beings, a in search of the precious meta.s. At this writing, over 500 people are so engaged, in the day time, and at night hundregs of lanterns may be seen sparkling and fitting along from place to place over the hills. ¿Up to tais time the ground has been staked of joy chaimants al. the way from the point of discovery to is en Eyrie, over 300 acres having already been

> On Thursday, McA. ister and Sherman sen: 1000 pounds of this ore to the sampling works of Dr. Munson, at Denver, for a mil assay. When Dr. Yunson makes returns from his assay of this ore and that from the Ute Passa Loce, it will be time enough for us to let our fee ings oose on this subject. If, nowever, these assays show even \$10 a ton in 30 c, we certain y save a future before us over waica tom much enthusiasm cannot be vented.

> Mr. W. S. Stratton, of this place, on Wednescay, send cown samples of ore or assay, from a discovery six mi es furtuer up the Ute Pass, of similar character to that of XcA lister and Sterman. The assay was made by Prof. Kerr, and snowed soci to the ton in gold, with no silver. Stratton reports the ore in sight as covering about fifty acres.

> On Wednesday, also, the Marcott Bros. sent cown same es of silver bearing cuartz taxen or tacm at a cepth of twenty eet, from a seven oot vein of so ic mineral on their place on Four Mee, sack of Pice's Peak, about thirty mi es from Colorado Springs. This ore yie deco in an assay made by Pof. Kerr, at he rate of

Wit out any desire to acc to an excitement which we pray may not end in smoke, we have above given acts as they have come to'us. A reacy miners and capitalists from the north and south have commenced forcing in to us. Real Estate owners here, at Co oraco City, and Manitou, are going around with smiling countenances. Some of our peop e refuse to believe in the reported richness of these discoveries; whi e officers, and among them argoog many old miners who ought to know, say that we have a "sure thing." Whichever party is correct, the exci,e entwi to some people good, and to ofners incalculable infury, should the whole thing thentuate in a "firz e." In a wery sport time: wi wi know our fate, however.

In any event we are in for another Fixe's Peax escitement, on a large scale. Let us love, in remembering the motto of the " sons "Pike's Peak or Bust," that we will be allowed to take ours without any "oust" in it.

FROM FOUNTAIN

The religious meetings have been kept to with interest curing the week. On Tuescay evening the people were gradi-

ried with a cengaria sermon by Rev. 3. 7. Vincent, a Coloraco Sorings. The designiful weather is a hovely to that irre ressive resident, "the oldest lingabitant." How is it? It is so in that the notes "runnist" and his Divide friends got away with so many horses at Coloraco Springs taal the livery men are unalic to get ull an outlit. And that the same shrewe parters did not leave money enough in that "sharp burgh" for the disconsoate owners to replace their depleted stocks; consecuently those crizens who desire to take an airing cave to go on coor if they go at a... MINING NOTES. REPORTED WEEKLY BY THE COLORADO SPRINGS MINING AGENCY.

EL PASO COUNTY. A week ago, Co. oraco Springs and vicinity! Association, next Thursday evening, the 27th pecame greatly excited over the discovery of a yold bearing edge within ess than a mile of Yanitou. Average samples, taken across the ecge, shower, by assay, a value of \$49.75 per ton. This was just discovered on the soul awest sice of the Sountain, and snowed a thickness of about 100 feet. The ore closely resembling that of the Summit District, San Juan, Dut assays show it to contain nearly the saine weight in silver as of gold, in which respect it | iffers from that of the Summit District. It is, nowever, free mi ling ore, tae gold and silver being amalgama ec. in some specimens, the minera is o ain y visible in the form o' sma. gloonles. A cuantity of the ore will be sent to Back . Fawk or mill test, which, if satisfactory, wi. insure the erection of a stamp mi mear the

mines at an early day, The report of this discovery becoming known, a number of our citizens at once started to prospect further in the vicinity of this cisc ivery, which resulted in the fincing of the ode of other places, and on poth sides of the Fountain. in the Territoria Council, again avors us with Their spaces promoted others to try their luck copies of pics under consideration by the Legat prospecting, until now nearly every man in is ature, selections from which we print in our this vicinity has one or more stakes set, and the seco umns to-cay. ledge has been found in places to a distance of 16 miles above the first discovery, on the Fourtain, and for severa miles east towards Canao Creek. Up to this time, severa auncrec claims have been staked. It is not to be subjused that these wil al prove to be valuable grinet, or that even a majority of them will so move. As not one has yet been thoroughly tested, nothing more can be said at present than tha. many of them give great promise of being very valuable.

We have reports of the same ore being found

Copper glance has also been discovered near Manitou this week, but in what quantity, has James E. Wooc, Treasurer. not yet been determined. The specimens brought in look very fine. This is foun. in a true fisure vein, in the granite formation The work of development on the Utt Pass Lode, situated near Manitou, goes on w la encouraging results. Two sample assays have line yet uneartned. been had of the full width of the ore vein, which showed from \$33 to \$35 to the ton in. gold and silver. An average specimen asssayed by C. W. Terry gave a return of \$103.96 gold, and \$3 36 silver, together \$109.32 to the A disdovery of another go copearing ode is

reported to have been made near Boisty Le, from which two assays showed \$120 and \$180 per ton. Arrangements have been mace to work it at once. Arrangements are being made by a number

enne Creek, to concentrate their forces on Single lode until they have thoroughly tester its worth, by tunneling to a sufficient cept's to prove its value. The lodes on this stream being very similar, the proving of one will sport what allimay be expected to be at the same

of about 40 feet below the surface. To more speedily test the worth of the mine, a shaft will a prior claim to a l the big rocks in the counbe sunk from the tunnel at the point noiv reached try. ed. This, it is thought, will soon revent with able mineral. Nothing has been heard from his mine at Manitou wil pay the entire nationthe mine this week. When inspected a week all debt, with the exception of \$700,000,000. rgo, they had just passed a small break, and he. Some of the pays, who have mines near the your this the vein looked more encouraging! Major's, are not going to be mean about it, but

have been trought in from Four Mile Creek, southwes, of Pike's Peak. These were taken rom a death of ten foot. PARK COUNTY.

The work of testing the lodes lately discovered near the road this side of South Park (is progressing encouragingly. SUMMIT COENTY. Some of the richest silver bearing ore; minec-

an the Territory are now being taken from the Jomstock Tunnel, by the Boston Company, of St. o.th's. Particularly from Loce No. 5.

Eight odes have been cut by the tunnel, but
one which showed on the surface. From the Generative of the ore :-

tieman wing knows whereon it will be accommon to the accommon vocates of Comstock Tunnel, in tunne one tire West. No. 5, north her inches of the same night, in No. 7, ver were struck; on the same night, in No. 7, which might inches of ga end were obened." five inches of ruby and brit e si-"BOULDER COUNTY.

Work on the Sceola Mine, at Sunsaine, is now being pushed with renewed vigor, working cay and night in sinking the shaft to greatepaic for the work of s neing, notwithstanding the greater part of the instance has been through the lean ore, found in all the mines in the vicinity of Sunshine. The shaft is now near y 90 feet deep, and almost through this so-called cap.

This cap having been passed through in the American and Grand View mines, which join Western the Osceo a on either side, it is mown that the Osceo a cannot be far from the immensely rica ore found below this "cap.

A Sne shall rouse and noisting machinery has hen erectet on the American, and every much more extensively than it has yet been

The Grand View Mine is now being wor & in the richest ore yet found, and is fast remunerating the company for the expense they were huan. at in sinking through the ean ore. This and the American mines have effectually proved. what may be expected of a the mines on the tellurium bet, when de th is reached.

ois of the institute and accurred in their stud-institute and accurred in their stud-inore satisfactory than theretofore; not to have the score two to one or one to nothing one day, and the next cay, between the same sines, to have it reached by counce Toures. It is fequently he cause of an t-hading and dissatis--Shou L De Datsman, when he strikes the ball, have any part of either of his feet outside the nes of his position, the umbire mus: ca_ "ou strike," etc. In addition to being declared out on such a strike, if the nat is cangle fair or on , he san De ced arec out at first base the same ès il ne nac made a lair suive. | Snouid the base be occupied, and a player be breed out, the stricer shame oe declared out, and the Dase runner shall return to the base he occu-Diec when the la was lit. Should a couple Day be made, then both hayers sha be out. ae icea is to have the fur penarty of the four strice" fail on the stricer on y. Inder the present ru ing a "ou strike" was o'ten more a punisamen! to his opponents than to the stricer. Another change is, that hase runners, running the base on a ni that is decided "lou." by the um tire, shall be permitted to return to the bases they have et without being but out. The following change in the chan bionship coce is also suggested, viz: The regular series shall consist of ten games, but to strike out Section This would eave it optional, in a meawriting, sie ing, etc., of prose who followed a sure, with he contesting class when arranging ing c.uss wou c no: se compeilet, as they have

games which they wou con with and the leadbeen of ate, to play with clubs without record or merit, simo y because such causs hac entered as contestants for the championship. To office at the close of the season which club is entitled to tae champions nin, the Champions ais Committee shall select from the contesting clubs which sha go through he season - say twe ve s nou c enter and ten go throught the seven c.u.s naving won the most games in the champions in contest, and the cub which sha win the greatest number of games, counting no games payed with other than the leading dubs se ected, sin be declared the chambion cub. Saou a two or more cause the in games won, the cub having lost the fewest games saal be cec arec compions.

The promise is that the professional campaign of 1876 wi be decided y more attractive and interest ng than that of any previous season. Durity the season which closec ast November, assemblages running far up in the thousands have been crawn together in Philace onia, Boston, Chicago, Brook yn, and St. Louis whenever there was to be a game between po mears on the recrease. There sti exists a. passionate ove o the game for its own sace, or the sake of again, the sunstine, the pure interest they take in the cause of these afflicted air, the green turf, freshness of heart, elasticity are combined in its practice. The contestants that wi's take the fierd and enter for the chamforces, S. Juis, Pai ace paias, Caicagos, Mutua s, and July, Lavens, of last season's k lass, with the Cincinnati and louisy ac C us as new, aspiran s for professiona notoriety. Wrain a few weeks those of ayers engaged for the coming campaign wil be summoned to their respective gathering places for the usua preliminaries of gymnastic and fie a practice.

THE MATERIAL FOR NEXT SEASON A though but a couple of months intervene pe ore the opening of the centennia season, many of the clubs have not yet combleted their ist of players, consequent y it is impossible to
